SUMMARY

Technical leader with 10+ years of IT experience and 5+ years directing Salesforce Marketing Cloud platform strategy for regulated financial services. Leads Salesforce Marketing Cloud architecture, integration design, and platform governance while managing engineers, mentoring technical teams, and partnering with product, compliance, and business stakeholders on customer engagement strategy. Salesforce-certified across 10+ platforms with deep expertise in enterprise data models, marketing automation, and real-time orchestration.

EXPERIENCE

Gojoko Technologies · Noida, India · Dec 2023 – Jul 2026

Senior Salesforce Marketing Cloud Developer

- Lead Salesforce Marketing Cloud strategy and technical governance across 3 UK banking brands, supporting 800k+ customers, 3M+ annual emails, 30+ customer journeys, and 30+ automated workflows.
- Manage and mentor 2 software engineers, overseeing technical delivery, code quality standards, performance development, and engineering best practices.
- Own platform architecture, technical roadmap, solution reviews, and technology decisions, partnering with product, compliance, and engineering leadership on strategic initiatives.
- Establish integration governance and architecture standards across Salesforce Marketing Cloud (SFMC), Salesforce, Mambu, QA, and Business Analysis teams, improving alignment and reducing delivery risks.
- Architected an enterprise Contact Builder data model integrating 10+ Salesforce objects and 500k+ records, enabling scalable personalization and customer lifecycle automation.
- Implemented a centralized consent and preference management framework with audit logging and real-time enforcement across email and SMS channels to support regulatory compliance requirements.
- Led evaluation and adoption planning for Marketing Cloud Next, building a multi-year modernization roadmap and identifying an estimated £35k in platform optimization opportunities.
- Delivered Einstein Send Time Optimization across customer engagement journeys, increasing average email open rates by 15%.
- Served as the sole Salesforce Marketing Cloud engineer responsible for architecture, development, and operational support across 3 UK banking brands.
- Designed and implemented end-to-end customer engagement solutions using Journey Builder, Contact Builder, Automation Studio, CloudPages, Server-Side JavaScript (SSJS), and AMPscript.
- Built scalable integrations connecting Salesforce Financial Services Cloud, external banking platforms, and Marketing Cloud for real-time customer communications.
- Developed SQL-driven automation frameworks for audience segmentation, data hygiene, and lifecycle management, reducing manual operational effort by 10+ hours per week.
- Implemented GDPR-compliant one-click unsubscribe and preference management solutions with automated consent tracking and audit capabilities, reducing subscription-related support requests by 45%.
- Designed API-driven and event-based customer journeys supporting critical banking communications and lifecycle engagement programs.
- Introduced AI-assisted engineering practices using Copilot, Claude, and Gemini for documentation, solution analysis, and development acceleration via MCP Servers, improving team productivity by approximately 10 hours per week.

Salesforce · Hyderabad, India · Jul 2021 – Nov 2023

Senior Marketing Cloud Engineer

- Designed near real-time lifecycle journeys using event-driven architecture and REST API event-entry sources for Fortune 500 financial services clients.
- Engineered one-to-one personalized email content using AMPscript, parsing complex JSON payloads from external systems.
- Refactored legacy SQL and Automation Studio activities, achieving 99.9% success rate for critical daily sends serving millions of customers.
- Developed SSJS middleware integrations for near real-time data synchronization across systems and platforms.

Persistent Systems · Nagpur, India · Mar 2020 – Jun 2021

Lead Project Engineer

- Led Service Cloud and Marketing Cloud integration architecture for regulated financial services use cases with bidirectional data exchange.

- Delivered Health Cloud solutions during COVID-19, architecting Mobile Studio SMS alerts and interactive email capture flows.
- Managed sprint planning, backlog grooming, and release governance for 5-member distributed team across business units.
- Conducted technical code reviews and established Salesforce development engineering standards.

HCL Technologies (Unica Practice) · Pune, India · May 2018 – Feb 2020

Member of Technical Staff

- Engineered complex IBM Unica campaign logic, translating 50+ legacy flowcharts into optimized SQL segmentation processes.
- Managed large-scale enterprise datasets and executed strict-SLA SQL validations for US clients.
- Partnered with business stakeholders to deliver campaigns, achieving 95% customer satisfaction rating.

SMARTEK21 · Pune, India · Aug 2016 – Apr 2018

Software Developer

- Developed scalable backend services using Java, Spring, and Hibernate with enterprise REST API integration focus.
- Delivered full software development life cycle (SDLC) applications including REST integrations, database schema design, and performance optimization.
- Executed platform migration from .NET to Java maintaining 100% data integrity and zero downtime.
